

PRODUCT INFORMATION TUNNELPUMP

TP 100

The **TP100** is a robust pump that was designed to handle drilling mud, tunneling slurries and any type of sand/water mixtures. Due to the horizontal outlet the TP100 is very much suitable for working environments where only limit space is available. The pump can be used as well horizontally as also vertically.

Technical Information

Article Number:	T24-3176
Material of casting :	HBN450
Size suction side:	DN125 PN10
Size discharge side:	DN100 PN10
Pump capacity:	approx. 100m ³ /h (7,3 GPM)
Pumphead:	approx. 30m (98 ft)
Max. grain size:	50mm (2 inch)
Impeller:	Half open Impeller
Sealing:	Expeller with greased packing
Weight:	approx. 350 kg (770 lb)

Distribution only by Tunnel24
